

# Lesson 4.3

## Area and Evaluating Expressions

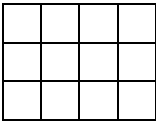

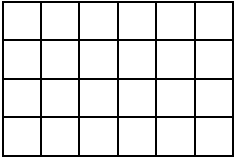

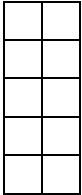

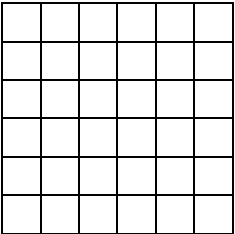

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Students will use the formula to find the area of rectangles given values for length and width.

Directions: Write the formula for each problem, then substitute the given values and find the area.

$$\text{Area} = L \times W$$

1) 	L =  W =	
2) 	L =  W =	
3) 	L =  W =	
4) 	L =  W =
