

Pacent Learning Solutions is looking for a self-motivated front-end designer to join their technology team and work on their data collection and reporting tool, PacentReporter. As a web designer you will work closely with the back-end programmer to create reports based on data being input by teachers and faculty we work with.

Responsibilities:

- Work directly with Technology Development Team to support teachers with rich reporting tools
- Create output from data mining operations on Pacent's PacentReporter website
- Create reports that output in HTML, Excel, and PDF formats
- Design web interfaces for electronic reporting
- Assist team with coding projects as needed

Required skills:

- Extremely well versed in website layout, design, and usability
- Extremely well versed and fluent in HTML, CSS; jQuery a plus
- Extremely well versed in common web authoring tools
- Ability to create website layouts based on simple mockups
- Ability to work independently and remotely
- Ability to make modular designs that can be implemented into existing systems
- Ability to handle codes quickly and rapidly adapt to changing priorities and schedules
- Ability to learn quickly and utilize new technology as it becomes available

Recommended skills:

- Fluent in AJAX
- Familiar with PHP and MySQL
- Knowledge of database design and proper database normalization
- Knowledge of proper file handling and user input security

Optional skills:

- Knowledge of Java
- Knowledge of TCPDF

Salary Range: \$50,000 - \$65,000/year
