

Day 1	Day 2	Day 3	Day 4	Day 5
Thursday 11/15	Friday 11/16	Monday 11/27	Tuesday 11/28	Wednesday 11/29
Core Class				
<p>Students will be able to simplify polynomials by collecting like terms and identify the degree of the polynomial- write in descending order.</p> <p>CA 10.0</p> <p>PH 5-5 PH 5-6 Examples: 1, 7, 9, Pg. 226 1</p> <p>Guided Practice: 5-5 f, g 5-6 a</p> <p>Independent Practice: Pg. 224 #'s 21, 22, 35, 36 Pg. 229 #'s 7-8</p> <p>Ticket Out # 9</p>	<p>Students will be able to evaluate polynomials</p> <p>CA 10.0, CA 2.0</p> <p>PH 5-6 Examples: 3, 5</p> <p>Guided Practice: Try This f, g, h</p> <p>Independent Practice: Pg. 229 #'s 15-19</p> <p>Ticket Out # 20</p>	<p>Students will be able to add & subtract polynomials.</p> <p>CA 10.0</p> <p>PH 5-7, 5-8 Examples: 5-7 #'s 1, 2 5-8 #'s 1, 2, 4</p> <p>Guided Practice: Try This 5-7 a, c Try This 5-8 a, c, f</p> <p>Independent Practice: Pg. 233 14-17 Pg. 238 7-10</p> <p>Ticket Out # 11</p>	<p>Students Will be able to solve problems from TEST 11 & TEST 10</p> <p>_____ % Mastery 11.1</p> <p>_____ % Mastery 11.2</p> <p>_____ % Mastery 10.1</p> <p>_____ % Mastery 10.2</p> <p>Prioritize Instruction According to Mastery.</p>	<p>Students will be able to solve problems from test 10 on HW</p> <p>TEST 12</p>
HOMEWORK				
Skills Practice 13: #'s 5-15	Reteaching 5-6	Reteaching 5-8	Practice Test 12	

PROGRAM: Algebra Week # 12

Day 1	Day 2	Day 3	Day 4	Day 5																																																																								
Wednesday	Thursday	Friday	Monday	Tuesday																																																																								
Support Class																																																																												
Students will be able to multiply, divide, add & subtract negative integers and know the different rules that apply to each operation.	Students will be able to use the distributive property to simplify expressions.	Students will be able to raise integers to positive powers.	Students will be able to solve.... (Review material from tests 10 & 11)																																																																									
NS 7.1.2*	AF 6.1.2, AF 7.1.3*	AF 7.1.2*	*(CDE Algebra Readiness Standard)																																																																									
Lesson 12.1	Lesson 12.2	Lesson 12.3	Lesson 12.x	Lesson 12.y

Examples																																																																												
$-3 \cdot -11$	$42 \div -3$																																																																											
$-3 + -11$	$3 + -42$																																																																											
7- 19	$8 - (-15)$																																																																											
Guided Practice																																																																												
$-5 \cdot -12$	$-64 \div 8$																																																																											
$-6 + -23$	$5 + -37$																																																																											
12- 21	$11 - (-12)$																																																																											
CFU																																																																												
$-6 \cdot -13$	$52 \div -2$																																																																											
$-5 + -35$	$9 + -28$																																																																											
11- 23	$9 - (-21)$																																																																											
Ticket Out																																																																												
$-3 \cdot -11$	$-7 - 15$																																																																											
Examples																																																																												
$-(x + 4)$	$-3(-5 - x)$																																																																											
Guided Practice																																																																												
$-(n + 7)$	$-2(-4 - n)$																																																																											
$4(7 - y)$	$9(13 - x - 5)$																																																																											
CFU																																																																												
$-(z + 5)$	$5(-6 + n)$																																																																											
$7(-x - 7)$	$-(-b - 3)$																																																																											
$-3(12 - z)$	$3(12 - z + 4)$																																																																											
Ticket Out																																																																												
$-(n - 7)$																																																																												
Examples																																																																												
$(-3)^2$	$x^2 \cdot x^4$																																																																											
Guided Practice																																																																												
$(-2)^3$	$n^2 \cdot n^3 \cdot n^4$																																																																											
$(-4)^2 \cdot (-4)$	$(3)^4$																																																																											
CFU																																																																												
$(-4)^4$	$b^3 \cdot b^4 \cdot b$																																																																											
$a^2 \cdot b^3 \cdot b^5$	$(5)^3$																																																																											
$(-2)^2 \cdot (-2)^3$	$(3)^2 \cdot (2)^3$																																																																											
Ticket Out																																																																												
$(-2)^6$
